

Omega intermediate bracket pre-galvanised

This Omega intermediate bracket is used to secure the fencing wires onto the Omega insulators. The Omega system utilises the mechanical strength of an existing fence to reduce the cost of constructing a complete new system.

Features:

- Robust design for intermediates posts
- Easy to transport reducing handling time and transport costs
- Holes every 100mm to accommodate the Omega insulators (Also available in 90mm Hot dip galvanised)
- Easy to transport reducing handling time and transport costs

Specifications:

Finish: Hot dip galvanised

Steel thickness: 1 mm

Lengths: 900mm, 1 200mm, 1 500mm, 1 800mm, 2 100mm, 2 400mm, 3 000mm
