

Enclosure - aluminium large

The aluminium enclosure is ideal for housing energizers and accessories. It is weatherproof and can be used in coastal areas due to the aluminium finish. It has a stainless steel lock and key and air vents for cooling.

Features:

- Ventilated for cooling
- Wooden electrically isolated backing plate for mounting the energizers and accessories
- Large capacity to house double energizers, solar regulator and deep cycle batteries.
- It is available in a shock box version. The shock box version is used for securing the box and its contents by electrifying the box itself.

Specifications:

Dimensions: H800 X W600 X D300

Material: Aluminium tread plate with a wooden internal back mounting board
