

Strain insulator - Ultra

Nemtek strain insulators are used at the beginning or at the end of an electric fence wire run. The strain insulator - Ultra is suitable for fence wire diameters up to 2.5 mm and a working load of 40 kgs. The strain insulator Ultra hardened is suitable for wire diameter of 3 mm and a working load of 140 kgs

The strain insulator - Ultra is available in black or white and the Ultra hardened in black only. Only virgin materials are used in their manufacture which are designed for a long life. They allow for larger creepage distance to reduce power loss.

Specifications:

Virgin plastics: UV stabilised for external use.

Colours: Black and white and only black for the Ultra hardened

Working max load: 40 kgs for the Ultra

140 kgs for the Ultra hardened
