

Compression spring heavy tension

ES-CNT3

The Nemtek compression springs heavy tension (15 kg) is used to maintain a constant tension on the electric fence wires. Wire tension on an electric fence will vary over time and the springs will maintain a constant force on the electric fence wires to keep them neat.

Features:

- A nylon plastic inner which eliminates galvanic reaction between dissimilar metal thus reducing rust and increasing the life of the wire
- Can be used with any type of Nemtek electric fence wire
- The heavy tension compression springs (15 kg) can tension wires from 1.6 mm up to 2.5 mm.

Specifications:

Material: Stainless steel and UV stabilised nylon inner.

Spring tension: 15kg
